U.S. Cancer Statistics

The United States Cancer Statistics are the official federal cancer statistics. These statistics include cancer registry data from CDC's [National Program of Cancer Registries \(NPCR\)](#) and the National Cancer Institute's (NCI) [Surveillance, Epidemiology, and End Results \(SEER\) Program](#), as well as mortality data from CDC's [National Center for Health Statistics](#). The statistics provide information on newly diagnosed cancer cases and cancer deaths for the whole U.S. population.
